Display Color Analyzer

MODEL 7123

Key Features:

- Luminance and chromaticity measurement of Color Display
- Support LED backlights display
- 0.005 cd/m² low luminance measurement (A712301)
- Wide luminance display range : (Option) 0.0001 to 25,000 cd/m² (A712301)
0.01 to 200,000 cd/m² (A712302)
0.01 to 6,000 cd/m² (A712200)
- High accuracy measurement
- Maximum 9 display modes:
xyY, TΔuvY, u'v'Y, RGB, XYZ,
FMA(A712200), FLVL(A712200), Contrast,
Program
- Support contrast, JEITA and VESA for
flicker measurements (A712200)
- Able to control Video Pattern Generator and
UUT (Unit Under Test)
- Built-in contrast measurement function to
calculate the contrast ratio directly
- Equipped with programmable test items that
can complete the planned tests with one
single button
- Support USB flash disk that can copy the
test procedures to other station for use
- Judgment function embedded to judge the
test result automatically with one single
button
- Calibration period setting and reminding
function
- Memory for storing 100 channels of
standard color data and calibration data
- Built-in flat display calibration data
LCD-D65 & LED-D65 to be applied
for chromaticity measurement instantly
- Optional display white balance alignment
system can be used to integrate all optical
test stations to one single station

DISPLAY COLOR ANALYZER

MODEL 7123

7123 Display Color Analyzer adopts the design of contact and non-contact type measurements based on the probe selected to measure the luminance and chromaticity of display panels. Developed with the most advanced digital signal processor and the technology of optoelectronic transfer as well as precision optical parts and circuit design, the 7123 Display Color Analyzer is capable of performing high speed, accurate and stable color tests.

The configuration of 7123 complies with the color matching function sensor of CIE 1931 and CIE1976 UCS that can measure the luminance and chromaticity of display panel accurately. Users can switch to various types of chromaticity coordinates freely including xyY, TΔuvY, u'v'Y, RGB, XYZ, FMA (A712200), FLVL (A712200), Contrast and Program 9 modes in total. The A712301 that is designed to test the LCD characteristics with LED backlight is able to meet the low luminance test requirements of 0.005cd/m². In addition, the A712302, designed for small size display in particular can solve the problem of color analyzer measurement area larger than the display area with its Ø5mm measurement area.

To satisfy the needs for automation, the 7123 is equipped with the function to control the video pattern generator and the UUT without using a personal computer to cut down the acquisition and management cost. The 7123 also has the functions of contrast measurement, result judgment and programmable test items that can fulfill the auto test requirements to enhance the production efficiency.

The Optical Measurement Software incorporated by 7123 is able to do chromaticity, luminance, Flicker (A712200) and Gamma measurements on PC, and then show the measured data on CIE 1931 and CIE1976 UCS chromaticity coordinate chart directly. Besides the function of drawing Gamma curve, the measured data can also be stored on PC and exported to EXCEL® for process. The example programs enclosed in optical measurement software allow users to develop the test programs that suit their needs.

7123 Display Color Analyzer has 100 channels of built-in memory for storing the value of standard colors and calibrated data. In addition, 7123 also provides many friendly user interfaces for operation such as the way test data shows, the position set for push buttons, the positioning projector, USB and RS-232 interfaces for data transmission, calibration period setting as well as reminding function and etc. to satisfy the requirements for actual measures. Using the USB flash disk, the test procedures can be copied to other stations for use and reduce the time for repeated editing considerably.

As the technology and products of flat displays have become the mainstream in the market today, every manufacturer is seeking for high value-added and low cost measurement solutions to raise its competitiveness ; 7123 Display Color Analyzer is the excellent tool to assist in achieving that purpose.
